

Please consider the following in your "localism" campaign about LPFM. National and regional programs serve each community. I listen to K-LOVE and have for 3 years. It brings me positive, encouraging Christian music and it provide me with the mental support I need just knowing they are there anytime with just a click of the dial. By them being National it encourages me that I have a whole nation in support of this music and this message and if I have a prayer request, I just need to call and people from all over the nation will be praying for me. Very few radio station now a days offer the public a station that the whole family can listen to without worrying about what the kids my hear. It is imparitive that station like K-LOVE stay on the air to be accessible to anyone that wants to draw close to God and get encouraging words from the DJ's and also have that one on one support if you need them. Please do not let LPFM take a priority over FM translators. I could not find a replacement like K-LOVE anywhere.
